Existing Wells							
Proposed Well							
Nearest Well							

This permit is issued for a TEST HOLE. The well will be completed within the spacing regulations* of the South Plains Underground Water Conservation District and measured distances shall be furnished to the District.

Signature

I agree that this well will be drilled within thirty (30) feet of the location specified and not elsewhere. <u>I have received a copy of the</u> <u>District rules and agree to comply with said rules.</u> I agree that all information provided on this application is correct, true, and in compliance with District rules. I agree that upon any violation of this agreement, the Board may order that the well may no longer be used until the problem is permanently resolved to the satisfaction of the Board. Furthermore, I authorize Directors, representatives and staff of the South Plains Underground Water Conservation District to enter upon the property represented on this form without notice to verify the information provided and conduct technical and other routine investigations deemed necessary.

This notice given by:

SECTION 7. WELL SPACING REQUIREMENTS

RULE 7.1 SPACING OF WELLS FROM PROPERTY LINES:

(a) A well permitted subsequent to the date of enactment of this rule shall be in a location and may produce no more than shown in the following categories:

Distance From Property Line (feet)	Maximum Rate of Production (gpm)
300-374	265
375-449	390
450-599	560
600-659	1,000
>660	>1,000

RULE 7.2 SPACING OF WELLS FROM EXISTING WELLS ON ONE'S OWN PROPERTY:

(a) A well permitted subsequent to the date of enactment of this rule shall be in a location and may produce no more than shown in the following categories:

Minimum Distance From Existing Wells on One's Own Property (feet)	Maximum Rate of Production (gpm)	
300	125	
600	265	
750	390	
900	560	
1,200	1,000	
>1,320	>1,000	

<mark>Initial</mark>

RULE 5.3 I understand that if this permit and State Well Report are not returned within four <u>(4) months</u>, this permit will be considered void and my deposit will not be refunded.

Initial

RULE 11.3 QUALIFICATIONS/PROCEDURES FOR REPLACING A PERMITTED/GRANDFATHERED WELL

- (a) Must be drilled within 75 feet of the well being replaced,
 - (b) Must be no nearer to adjoining property lines within the spacing limitations in Rule 7.1,
 - (c) May not produce more water (gallons per minute) than the well it is replacing
 - (d) In all cases, the well being replaced must be plugged in accordance with Rule 10.2 (cement or bentonite).

For District Use Only:
